

JAL Innovation (Singapore)

The Emerging Leader For Biomedical Solutions In Singapore

JAL Innovation Singapore's goal is to serve our global partners with a truly integrated biomedical manufacturing facility. We offer a wide range of advanced rapid in-vitro immunodiagnostic test kits and electrical bio sensing systems, particularly blood glucose monitoring systems and nebulizers for home and professional uses.

Our manufacturing facilities in Taiwan and China are ISO 13485 & GMP certified. Our regional warehousing facilities are strategically located in Singapore [there are 2 locations in Singapore and both are located within the Changi Air Cargo Complex free trade zone]. Other sub-warehousing facilities are located in Taiwan and China.

We are committed to serve our partners by manufacturing and distributing high quality, reliable and competitive products and services and distribute them to every continent. Our vision is to provide safe, reliable and cost effective solutions and products in markets around the world.

Our range of products include our OK in-house brand and iCare global label brand of diabetic monitoring systems and also our extensive range of iCare range of in-vitro diagnostic testing kits, particularly for infectious and sexually transmitted diseases. We serve many ODM and OEM partners particularly in African and European countries.

Our iCare brand of rapid test kits products cover Health Screening, Infectious Diseases, Fertility, Chronic & Critical Illnesses, Alcohol and Drugs of Abuse. We also specialize in producing a complete range of field use (or home version sex transmitted diseases [STD] test kits as well and they are sold primarily through online stores or e-stores partners throughout the world. Our Taiwan production facilities produce a wide range of iCare blood glucose monitoring systems for capillary blood and AST (alternate site testing) and nebulizers to meet every demand of the market.

JAL Innovation Singapore is a member company of OK Biotech Co Ltd Taiwan, a public listed manufacturer listed in the Taiwan Stock Exchange. Our blood glucose monitoring systems are FDA, CLIA Waived and CE certified; and our selected rapid test kits products are listed with WHO, Global Fund, USAIDs, CE, FDA, 510K and CLIA Waiver approved.

We are pleased to share these exciting news – that is, JAL Innovation in collaboration with our South African partner have WON one of the world's largest HIV 1&2 rapid test kits national tender for years 2014 to 2017. The total tender calls for the supply of more than 35 million tests.

We have been recognized by many global partners as the leading supplier of FIELD / SELF-TEST versions of a complete range of test kits for HIV 1&2, HBsAg (Hepatitis B), HCV (Hepatitis C), Syphilis, Gonorrhea, Chlamydia, and Prostate Cancer. We also produce Multi Infection Single Test Cassette for HIV 1&2 – Syphilis – HBsAg – HCV. Our blood grouping rapid tests ABO/RhD are gaining worldwide acceptance as well.

We have been earmarked to be one of the most promising emerging biomedical manufacturing companies and amongst the largest exporters of In-Vitro Diagnostic products in Singapore.

We welcome opportunities to work with Global Partners / Medical Devices Importers to work in close collaboration to expand our overseas markets. We are a firm believer of win-win business collaboration proposals.
